Backend Developer [GiddyOps](#) USA

From January 2022 to October 2022

- I played a key role in developing a game-changing Admin Panel, streamlining how we manage schedules, customers, and day-to-day operations.
- My work included creating a flexible architecture to attract more customers, boosting our growth.
- I also optimized our system for speed and efficiency by fixing slow database queries, saving us 25% on AWS Lambda costs.
- Additionally, I developed APIs that powered core functions for our mobile app and Admin Panel. My contributions made a tangible impact on our success

Full-Stack Developer [Addis Software](#) Addis Abeba, Ethiopia

From June 2022 to October 2022

- I developed diverse software applications, including Drag and Drop interfaces, Marketing Affiliate tools, and Edi-tech Games.
- I worked both individually and in teams, contributing to large-scale projects, enhancing my
- problem-solving skills. Achieved a 60% increase in reach and revenue generation by implementing captcha bypass on the Affiliate Marketing app.
- Integrated Stripe payment for improved security and seamless transactions

Freelancer at [Upwork](#) [Upwork](#) Remote

From January 2019 to January 2022

- **Developed numerous projects (Websites, Telegram Bot, Scraping, and Marketing Apps).**
- **Recommended and consulted with clients on Backend development and Bot Development.**
